

## MULTIFACETED STYLE

A polished stone and bamboo staircase, which leads to a playroom and the study, sets the prismatic tone in the home's entrance. These materials are used throughout the interior, and lend the home warmth. The spacious reception areas can be found on the left-hand side of the house, and are filled with numerous sofas and chairs, all bought in Europe from luxury brands such as Hermès, Armani and Fendi. Rather than relying on an interior designer, the homeowners furnished the house themselves from their wish list. This Italian marble dining table is just one of their handpicked treasures.

**Dining room** The table and chairs were found at Henge. The wooden objects on the table were bought at a gallery in Rochester, Minnesota. The pendant light was discovered in a boutique in Kuwait.
